CCS Enterprise Solution

Every successful business will require an enterprise wide financial system. Accurate corporate financial performance analysis roll-up from each company, each cost center, each cost of inventory or each profit gained from a customer is important. CCS Enterprise 8.5 will detail every transaction of your business.

Inventory and Trading Centric Financial System

CCS Enterprise 8.5 – Inventory module is an integrated system of customer order, purchasing, accounts payable and accounts receivable.

Accurate Inventory cost is calculated based on precision 6 digit decimal exchange rate. Accurate business cost is recorded by cost center, cash payable and recurring expense. It is designed to improve all functional processess of a company to achieve steady productivity and business growth.

Financial Status on Business Unit

CCS Enterprise 8.5 seamlessly connects different departments, the store, the sales dept, the purchasing and the accounts dept in a network supporting the whole enterprise. Multiple budgets are setup to define business target and shape vision. Timely report on multiple business unit ensure financial performance and management.

Regional Companies Consolidation

CCS Enterprise 8.5 is built on true 32-bit Windows platform for both local area network or wide area network set up. Regional companies can be consolidated in multi-currency in one group account.

Reporting Made Easy

Hundreds of summary, detailed reports and built in powerful financial report generator that simplifies the reporting across multiple companies, and daily operations.

"Create your Stock code, bar-code label and use the mobile laser bar-code scanner for Palm PDA to track your stock with the stock master program. Do your daily stock count with ease."
